- Supabase
- Node.js
- Webflow
- Git / Github

LINGUISTIC

- English: Professional Level
- Mandarin Chinese: Basic
- French: Native

HOBBIES

- Traveling / hiking
- Motorcycles
- Sport / Fitness

NEXT.JS / TYPESCRIPT DEVELOPER

Franck GALLIOD

Former military member, I chose to turn into the tech industry for the opportunities it offers. To achieve this, I taught myself Webflow and completed web developer training, which helped me discover a true passion.

COMPLETED PROJECTS

● FlowScribe - Independant

I developed another Webflow application. A programmatic SEO pages generation with AI. Helping website to rank on long tail keywords.

● Web Directories - Independant

I developed five directories in Next.js to practice and use programmatic SEO (pSEO), to generate traffic and monetize them.

● LinkerFlow - Independant

Project developed with a partner using Next.js / Supabase technologies in TypeScript language, as well as multiple third-party APIs.

● Training Projects - Wild Code School

We completed three projects during my training: the first with HTML, CSS, and native JavaScript technologies, the second with React, and the third as a full-stack project with React, Express, and MySQL.

● No Code Projects - Freelance

I developed several websites with Webflow for clients and for myself. I also independently developed and attempted to sell a micro SaaS with Bubble.

PROFESSIONAL EXPERIENCE

● Freelance - No-Code Developer

October 2023 - January 2024

After self-learning with Webflow, I had the opportunity to work as a freelancer for clients from friends/colleagues who wanted a modern no-code website.

● Fusilier Parachutist - French Air Force

June 2016 - October 2023

Non-commissioned officer responsible for military facility security.

Intervention team leader, Protection Control Center chief.

Completed numerous courses and training within the institution.

FORMATIONS

● Wild Code School - Javascript Web Developer

Février 2024 - Juillet 2024

5-month intensive training program (Equivalent to a 2-year degree) With learning of React - Node.js - Express - MySQL - Git/Github, we worked on project with groups of four people.

● Lycée Sainte Catherine - Baccalauréat STI2D

Septembre 2012 - Juillet 2015
